

RAF Benson

Value:

£7,000,000

Client:

CAE Electronics Ltd

Location:

London/South East

Description

The construction of the training facility was part of a PFI Contract with the MOD.

The 7,305m² building houses 6 helicopter simulator installations together with associated training and administrative accommodation on four floors. The site was situated within a fully operational RAF airbase with all the associated security, logistics and liaison in place.

The design team supported the PFI bid throughout its formulation and then was appointed to complete the project on site.

RLF Role:

Quantity Surveyor

Other Project Consultants:
