

Yorkshire Schools PFI

Value:

Four Contracts, total value: £ 5,400,000

Client:

Accord

Location:

North of England

Description:

RLF have recently overseen the completion of four new primary schools in North Yorkshire for one of our PFI clients Accord. The self-contained schools were built in diverse locations that included brownfield sites, areas of archaeological sensitivity, residential and rural situations, some with challenging topography. Unique design solutions and high quality specifications were required, with each school providing core facilities including gymnasiums, libraries, full catering kitchens, computer suites, sports and social areas in support of the well appointed class rooms. Externally, the schools were extensively landscaped and were provided with play areas, green class rooms and sports facilities including a high degree of security and lighting installations.
